Festool says thank you for 100 years of trust in the form of limited special editions

Limited 100th anniversary editions of the TSC 55 K and TS 60 K plunge-cut saws in the 100th anniversary Systainer³ with cap - promotional period from 17 March 2025 - while stocks last

Festool is celebrating its 100th anniversary in 2025 and is thanking its customers with numerous limited 100th anniversary editions of selected products. The anniversary year kicked off with the limited edition 100th anniversary DOMINO DF 500 and the ECO SYS. From mid-March, Festool will be offering limited special editions with the TSC 55 K or TS 60 K plunge-cut saws in the special blue 100 years Systainer³ with a free 100 years cap*1 - as well as the attractive guide rail in the blue 100 years design.

Over the past 100 years, Festool has brought a multitude of innovations to the market that have made professional craftsmanship easier, faster and safer. These limited 100-year special editions are a tribute to a century of innovation and craftsmanship that has made Festool a trusted partner for craftsmen worldwide.

Festool plunge-cut saws have been setting the standard in sawing for decades

The success story of the portable circular saw began in the early 1950s and reached an unprecedented level of precision in 1962 with the invention of the first guide rail. Handier and more precise: 1980 marked the beginning of the success story of Festool plunge-cut saws, which are still among the best of their kind today. In the anniversary year 2025, Festool is now commemorating the constantly renewed standards in terms of precision, safety and efficiency with the limited 100-year special editions of the current TSC 55 K and TS 60 K plunge saws and the FS 1400 guide rail in the blue 100-year design. These 100-year special editions are an exclusive and limited 100-year edition in a blue Systainer³ with cap - each with or without a blue 100-year guide rail, which is also available separately.

The TSC 55 K plunge-cut saw

The tried-and-tested TSC 55 K cordless plunge-cut saw with a cutting depth of 55 millimetres works twice as fast thanks to the 1.8 mm thin-cutting saw blades and offers a greater battery range. The unique KickbackStop increases safety by minimising the risk of injury from kickbacks

The TS 60 K plunge-cut saw

The TS 60 K is the most versatile plunge-cut saw from Festool. With a cutting depth of 60 millimetres and a compact design, it enables first-class results with mitre cuts and solid panels. An outstanding feature of the TS 60 K is the unique KickbackStop, which protects the workpiece and minimises the risk of injury. This function makes the TS 60 K a highly precise and safe choice for craftsmen.

The FS 1400 guide rail - Precise cuts and versatile applications

Since its invention over 60 years ago, Festool has continued to perfect the guide rail. The result: Straight and precise cuts - effortlessly. To celebrate its 100th anniversary, Festool is offering the limited-edition FS 1400 guide rail in a blue design. What began with the rail has led to ever more diverse possibilities: The Festool guide rail accessory system. Versatile accessories such as stops and clamps are perfectly matched to the saws and really make work easier.

Exclusive benefits and availability

Festool is offering the limited special editions of the TSC 55 K plunge-cut saw and the TS 60 K plunge-cut saw in the exclusive blue 100-year systainer³ - with or without a 100-year guide rail and with a free 100-year cap as well as the guide rail as a single item from 17 March - while stocks last. Further information is available at [festool.co.uk](https://www.festool.co.uk)

New: Ideal system accessory - the FS-EZ 150 one-handed clamp

The new one-handed clamp offers maximum flexibility and ease of use. It enables tool-free switching between clamping and spreading and integrates seamlessly into the Festool system world. With a clamping width of up to 150 mm and a spreading width of 120-310 mm, it fixes guide rails and workpieces securely and precisely. The integrated pump lever and release lever ensure easy handling with just one hand.
