Maximum performance, maximum safety and full mobility - even when cross-cutting

The new HKC 55 K cordless portable circular saw - available from September 2025

Maneuverability, precision and safety - with the new HKC 55 K, Festool is setting new standards in the field of mobile cordless portable circular saws. The German manufacturer has developed this powerful saw especially for professional craftsmen who no longer want to compromise on mobile cross-cuts on the construction site or in the workshop. With innovative functions, a powerful 8.0 Ah battery pack and perfectly coordinated system components, the HKC 55 K offers everything you need for efficient and safe work.

Maximum power with the best cutting performance

At the heart of the HKC 55 K is a brushless EC-TEC motor with 5,200 rpm, which, in combination with the power electronics and the 8.0 Ah Li-HighPower battery pack, ensures impressive cutting performance and long runtimes. The specially developed 1.6 mm thin-cutting saw blades not only enable fast work progress, but also extend the battery life - ideal for mobile use.

Fast, precise and mobile cross-cuts

Thanks to the simple coupling with the FSK cross-cut rail, the HKC 55 K becomes a mobile cross-cut saw system. Whether on the roof or on the ground - precise, angular cross-cuts are possible everywhere. The fixed contact bolt, the adjustable stop and the return function enable exact repeat cuts in the angle range from -60° to $+60^{\circ}$. Mitre cuts up to 50° are also effortless - the scribed edge always remains the same as the cutting edge.

Security that thinks for itself

Festool attaches great importance to user protection. The innovative KickbackStop significantly reduces the risk of injury in the event of kickback and protects both the user and the workpiece. The integrated guide wedge also prevents the saw blade from jamming. The pendulum guard can be opened easily and safely using the pendulum guard remote control. This ensures safety and really makes work easier.

Convenient handling for everyday work

The cutting depth adjustment with plunge function allows safe and convenient plunging to the preset depth. The combination with the tried-and-tested Festool guide rails further extends the range of applications. Despite its high performance, the HKC 55 K weighs just 3.6 kilograms (without accessories), making it easy to handle.

With the HKC 55 K, Festool is launching a cordless portable circular saw from September 2025 that impresses with its performance, safety and mobility. It is the ideal solution for anyone who values precise work, high efficiency and maximum safety - no matter where the project takes place. Maximum performance, maximum safety and full mobility - even for cross-cuts

The new HKC 55 K cordless portable circular saw - available from September 2025

With the new HKC 55 K, Festool is launching a cordless portable circular saw that has been specially developed for professional craftsmen. It impresses with a powerful EC-TEC motor with 5,200 rpm, an 8.0 Ah Li-HighPower battery pack and 1.6 mm thin-cutting saw blades for high cutting performance and long runtimes.

Thanks to the coupling with the FSK cross-cut rail, the HKC 55 K becomes a mobile cross-cut saw system - ideal for precise angle cuts from -60° to +60° and mitre cuts up to 50°. The KickbackStop protects against kickbacks, the guide wedge prevents the saw blade from jamming and the pendulum hood remote control ensures greater safety when sawing.

Weighing just 3.6 kilograms, it remains handy and flexible in use - on the roof, on the ground or in the workshop. The HKC 55 K stands for precision, efficiency and safety - wherever professional results are required. Further information at festool.co.uk

Technical data of the HKC 55 K cordless portable circular saw

Drive type	Rechargeable battery
Battery voltage (nominal voltage)	18 V
Idle speed	5,200 min ⁻¹
Saw blade Ø	160 mm
Angle range	0 - 50 °
Cutting depth	0°; 90° 0 - 55 mm
Cutting depth	45°/50° 42/38 mm
Dust extraction connection Ø	27/36 mm
Product weight without accessories	3.6 kg

Powerful sawing everywhere - with the new HKC 55 K from Festool

More power and endurance

The HKC 55 K has a brushless EC-TEC motor with 5,200 min⁻¹. In combination with the power electronics and the 8.0 Ah battery pack, this ensures maximum cutting performance and long running times.

More safety thanks to KickbackStop

The built-in KickbackStop reduces the risk of injury from kickback when sawing. This not only protects your workpiece, but also your hands.

Mobile cross-cut saw system

The HKC 55 K can be easily coupled with the FSK cross-cut rail and enables precise, angular cross-cuts. There is a suitable cutting length for every requirement: 250 mm, 420 mm or 670 mm.

Pendant hood remote control

For a clear view of the saw blade and controlled sawing, the pendulum guard can be opened using a lever. Your hands always remain at a safe distance from the saw blade.

Guide wedge for high safety

The guide wedge enables unhindered, tension-free and therefore safe sawing. As it is inserted into the spring-mounted pendulum hood is integrated, plunge cuts are also possible safely and unhindered.

Depth adjustment with immersion function

Simply squeeze the lever and set the desired cutting depth using the scale. Unlock the immersion position and immerse safely and comfortably to the preset depth using the spring-assisted immersion function.

Thin-cutting saw blades with 1.6 millimeters

Specially developed for cordless saws: For low cutting pressure, fast work and extended battery life. The FastFix spindle stop allows you to change the saw blade quickly and easily.

Anirss equals cut

Precise work even with miter cuts up to 50°. When working with the HKC 55 K in combination with the guide or cross-cut rail, the scoring edge always remains the same as the cutting edge, even when miter cutting.

Brushless EC-TEC motor

Ensures powerful and energy-saving operation as well as long service life.
