Innovation meets system

Festool stands for its system concept and presents new accessories and consumables from autumn 2025

For over 100 years, Festool has stood for the highest quality, precision and innovative strength in the field of power tools. The family-run traditional company based in Wendlingen am Neckar develops and produces tools that are specially tailored to the requirements of professional craftsmen - especially in the areas of wood construction, painting and renovation work. With over 350 patents and more than 80 international awards, Festool is synonymous with sophisticated solutions that make everyday work easier and more perfect.

System concept as a success factor

Festool has always pursued a consistent system approach: tools, accessories and consumables interlock seamlessly and enable efficient, comfortable and precise work - in line with the motto "Perfection down to the last detail". This means that accessories and consumables are not mere additions, but an integral part of a well thought-out overall concept. The perfect coordination of all components - from tools and accessories to vehicle equipment - enables smooth working without compromise.

This approach is also reflected in the continuous expansion of the product range. With the new products from autumn 2025, Festool is once again setting new standards in terms of quality, functionality and user-friendliness.

New products at a glance: Accessories with system

Mobile workbench in Systainer³ format: Systainer³ SYS3 MFT M 112

A highlight of the new accessories range is the mobile workbench in the compact Systainer³ format. The integrated MDF perforated plate with V-groove allows a wide variety of workpieces to be securely fixed in place - even round rods and tubes up to Ø 50 mm. A non-slip adhesive base provides additional support, even without clamping devices. Inside, the Systainer offers storage space for accessories and consumables. Thanks to optimum integration into the bott vario3 van racking system, it is ideal for mobile use.

New thin-cutting circular saw blades for cordless saws

For precise cuts with cordless saws such as the HKC 55 K and TSC 55 K, Festool is presenting new circular saw blades with a cutting width of just 1.6 mm. The "WOOD FINE CUT", "WOOD RIP CUT", "WOOD STANDARD" and "WOOD UNIVERSAL" variants enable maximum cutting performance with minimum effort - for more running metres per battery charge and a perfect cutting result.

Granat Net abrasive systainer³ D150 and D225

The new abrasive systainer³ with Granat Net sanding discs offer a wide selection of grit sizes from P60 to P240. Thanks to the net structure, they enable virtually dust-free work - ideal for coarse to fine sanding. The abrasives are clearly sorted and protected in the practical Systainer, which is an advantage both for mobile use and in the workshop.

Milling accessories for international applications

With the new APS 900/3 worktop template, Festool is expanding its range of routing accessories with a solution for 635 mm deep worktops. The range is complemented by new copying rings in inches - ideal and precise for international routing work.

TOPROCK Bluetooth® speaker with USB-C

From autumn 2025, the popular TOPROCK Bluetooth® speaker will be supplied with a modern USB-C charging cable including mains plug - in line with current standard requirements and the demand for contemporary equipment.

Limited anniversary edition: 100 years of Systainer

To mark the 100th anniversary, Festool is launching an exclusive special edition: The Systainer³ SYS3 S 76 in blue impresses with its flexible dividers and compact size - ideal for storing small parts and hand tools. The limited edition has been available in the Festool fan shop since September 2025.

Further information on the new products can be found at festool.co.uk

Innovation meets system

New accessories from Festool from autumn 2025

Festool has stood for quality, precision and sophisticated solutions in the field of power tools for over 100 years. The Wendlingen-based company develops tools and accessories that are perfectly tailored to the requirements of professional craftsmen. The system concept takes centre stage: accessories and consumables are an integral part of an overall concept that enables efficient and comfortable working.

Festool will be adding numerous new products to its range from autumn 2025:

- Systainer³ SYS3 MFT M 112: A mobile workbench with MDF perforated plate, V-groove and adhesive base - ideal for travelling.
- New circular saw blades for cordless saws such as HKC 55 K and TSC 55 K with a cutting width of just 1.6 mm for maximum performance.
- Granat Net abrasive systainer³ in D150 and D225.
- Milling accessories: worktop template APS 900/3 for 635 mm depth and new copying rings in inch size.
- TOPROCK Bluetooth® speaker now with USB-C charging cable.
- Limited anniversary edition: Systainer³ SYS3 S 76 in blue to mark the company's 100th anniversary.

PICTURE PREVIEW - @Picture rights Festool GmbH

The mobile workbench in Systainer format: Systainer³ SYS3 MFT M 112.

The handy workbench in Systainer format

With the Systainer³ MFT, you are always prepared for minor adjustments wherever you are: simply place the workpiece on top, clamp it and work on it directly on site.

Extended work surface

Simply practical: A second Systainer of the same height (SYS3 M 112 or SYS 1 T-LOC) can be used as a tray for longer workpieces.

Versatile fastening options

Various workpieces can be fastened to the MDF perforated plate - even round rods and tubes (up to Ø 50 mm) with the integrated V-groove. The adhesive base provides additional support when working, even without clamping.

Mobile workbench with storage space

Accessories and consumables can be neatly stored and transported inside the Systainer³ MFT - so everything is always ready to hand.

The new **1.6 mm thin-cutting saw blades** enable maximum cutting performance: fast work progress and perfect cutting results thanks to optimum interaction between the saw blades and the cordless saw.

Abrasive Systainer³ Granat Net D 150

The abrasive Systainer is the ideal companion for the sanding machine thanks to the wide selection of grit sizes of the net abrasive. With 20x Granat Net sanding discs each in grit sizes P60, P80, P120, P180, P240 and 2x protection pads, you are perfectly equipped.

Abrasive systainer³ Granat Net D 225

The abrasive systainer is the ideal companion for the long-neck sander thanks to the wide selection of grit sizes of the net abrasive. With 25x

Granat Net sanding discs each in grit sizes P80, P120, P180 and P240, you are perfectly equipped and can start sanding straight away.

The new clever **worktop template APS 900/3** is also suitable for 635 mm deep worktops.

Festool will be supplying its popular **TOPROCK Bluetooth®speakers** with a USB-C charging cable (incl. mains plug) from autumn 2025.

Limited 100th anniversary edition in the fan shop
