## Mobility meets power and safety

The new TSC 55 KS cordless plunge-cut saw from Festool - available from specialist dealers from March 2026

**Festool has stood for maximum precision and quality in plunge saws for over 40 years. With the new TSC 55 KS cordless plunge saw, the company is once again setting new standards - especially for professional users who want to work safely, precisely and on the move. Whether on the construction site or in the workshop: The TSC 55 KS impresses with its compact design, powerful performance and innovative safety functions.**

"The TSC 55 KS is our answer to the increasing demands in the trade. It combines mobility, performance and safety in a compact system - making it the perfect tool for carpenters and joiners who deliver top performance every day," explains Boris Seyfried, Product Manager at Festool.

### Lightweight, compact and ready for immediate use

The TSC 55 KS is designed for maximum mobility. Thanks to its compact design and low weight, it fits perfectly in the hand and is immediately ready for use - with just one battery pack. The slim design enables precise cuts directly on the wall and without overhang on the guide rail. One battery pack on the saw, the second on the charger: this makes uninterrupted work standard.

### Powerful performance and maximum endurance

Inside the TSC 55 KS, a brushless EC-TEC motor with 5,200 rpm<sup>1</sup> in combination with intelligent power electronics and the 8.0 Ah Li-HighPower battery pack ensure impressive cutting performance. The specially developed 1.6 mm thin-cutting saw blades enable energy-saving work, extend the battery life and deliver clean cutting results - ideal for demanding applications in timber construction and interior fittings.

### Safety thanks to KickbackStop

Safety is a central element of the new cordless plunge-cut saw. The new, sensor-barred **KickbackStop** reacts at lightning speed and stops the saw blade in the event of a kickback - faster than the blink of an eye. This not only protects workpieces, but also effectively protects the user's hands from injury.

### System of possibilities

A comprehensive accessory system is available for the TSC 55 KS: Guide rails, angle stops and saw tables enable precise cuts and clean processes - without any reworking. The new **LM-TS/TSC light module** ensures optimum visibility directly at the cutting area, even in poor lighting conditions. And the new **SB/2-TSC/HKC dust collection bag** enables mobile, low-dust work - even without a connected vacuum cleaner. Thanks to the opening flap, it can be emptied easily and completely. Thanks to the innovative folding mechanism, the dust bag can be transported with the appliance in the Systainer and is immediately ready for use with just one hand movement. Both new accessories will be available from March 2026 and can be easily retrofitted to all plunge-cut saws.

### Lockable angle support

Even when the vacuum cleaner is connected, the new lockable angled nozzle makes work easier. The user decides whether the suction hose is fixed in a desired position or rotates flexibly through 360° with your application.

### **Digitally networked - always in view**

The battery status, motor temperature and KickbackStop function can be called up at any time via the Festool app. Of course, software updates are also possible via the app - for future-proof use.

The new TSC 55 KS cordless plunge-cut saw will be available from March 2026 - as a basic version or including a guide rail. Weighing just 3.5 kilograms, it remains handy and flexible to use - on the roof, on the ground or in the workshop. Further information at [festool.co.uk](https://festool.co.uk)

### **Mobility meets power and safety**

**The new TSC 55 KS cordless plunge-cut saw from Festool**

**Festool is setting new standards for precise, mobile and safe working with the new TSC 55 KS cordless plunge-cut saw. The saw impresses with its compact design, powerful performance and innovative safety functions.**

Thanks to its low weight and slim design, it is ready for immediate use - with just one battery pack. The second battery can be charged in parallel, allowing you to work without interruption. The brushless EC-TEC motor with 5,200 rpm<sup>1</sup>, in combination with the 8.0 Ah Li-HighPower battery pack and special thin-cutting saw blades, ensures energy-saving work and clean cuts.

A special highlight: the new sensor-based KickbackStop, which stops the saw blade at lightning speed in the event of kickback - for greater safety and protection. Accessories such as guide rails, angle stops and the new LM-TS/TSC light module as well as the SB/2-TSC/HKC dust collection bag extend the range of applications. The Festool app can be used to monitor the battery status, motor temperature and KickbackStop function - including software updates. The TSC 55 KS will be available from specialist dealers from March 2026 - as a basic version or with a guide rail. Further information at [festool.co.uk](https://festool.co.uk)

### **Technical data of the TSC 55 KS cordless portable circular saw**

Drive type	rechargeable battery
Battery voltage (rated voltage)	18 V
Idle speed	3,500 -5,200 min <sup>-1</sup>
Saw blade Ø	160 mm
Angle range	-1 - 47 °
Cutting depth	0 - 55 mm
Cutting depth 45°	43 mm
Dust extraction connection Ø	27/36 mm
Product weight without accessories	3.5 kg

---

**Mobility meets power and safety: The new cordless plunge-cut saw TSC 55 KS from Festool is made for professionals**

**Boris Seyfried - Product Manager at Festool**

**More power and endurance**

The TSC 55 KS has a brushless EC-TEC motor with 5,200 rpm<sup>1</sup>. In combination with the power electronics and the 8.0 Ah battery pack, this ensures maximum cutting performance and long runtimes.

**More safety thanks to KickbackStop**

The new sensor-based KickbackStop minimises the risk of injury from kickback when sawing. This not only protects your workpiece, but also your hands.

**Exceptional pulling power**

Matching the concentrated pulling power of the plunge-cut saw: the 1.6 mm thin-cutting saw blades. Specially developed for cordless saws for clean cutting results cutting results, fast work and extended battery life.

**Precise depth setting**

Easy to read and set: Cutting depth setting with double pointer and fine adjustment for precise setting and parallax-free reading. For working with and without a guide rail.

**Mobile low-dust working**

Think health twice: Whether with a dust bag or a vacuum cleaner with Bluetooth® automatic switch-on - the Festool dust extraction system allows you to work virtually dust-free.

**Lockable angle support**

Fixed position or 360° flexibility: The user decides whether the suction hose is fixed in a desired position or rotates flexibly with your application.

**Best lighting conditions**

The LED attachment light brings light into the sawing area. Shadow-free illumination to the right of the plunge-cut saw - exactly where it counts: directly on the workpiece.

**Stay Connected:** By linking to the Festool app, important saw information can be important information about the saw: detailed display of the battery charge status as well as data on the current motor temperature or the KickbackStop function. Software updates are also possible.

**System of possibilities:** The saw accessory system is just as diverse as the requirements. Clever accessories such as saw blades, dust extraction, angle stops and splinter guards. New to the system are the LM-TS/TSC light module and the SB/2-TSC/HKC dust bag

**For the ideal cut:** the new 1.6 mm thin-cutting saw blades are specially optimised for cordless saws: For more running metres per battery charge and maximum work progress. The special group toothing (WOOD FINE CUT & WOOD UNIVERSAL) ensures optimum cutting performance and quality.

The TSC 55 KS is ideal in combination with the **8.0 Ah Li-HighPower battery pack for maximum runtime** and maximum performance. Can also be used with the new 5.0 Ah Li-HighPower battery pack.

#### **Brushless EC-TEC motor**

Ensures powerful and energy-saving work and a long service life.

**The LED light** is magnetically attached to the saw and illuminates the right-hand saw area without shadows - with two light levels for up to 130 sawing cycles. It is detachable, rechargeable via USB-C, displays the charge status and can be easily retrofitted to all TS plunge saws thanks to the self-adhesive metal plate.

The **dust collection bag** enables low-dust work without a vacuum cleaner - for full mobility and less cleaning effort. It is fitted in one easy step, catches dust directly at the point of discharge and can be emptied easily and com
