Function meets brand – new accessories for workshops, construction sites and leisure time

Festool expands fan shop – from April 2026

With a palpable passion for quality, function and brand identity, Festool is presenting a new selection of fan shop items for spring 2026 that will delight professionals and fans alike. Whether for precise work on the construction site, creative additions to your own 3D printing or reliable companions for sun and rain – the new products combine genuine Festool DNA with everyday practicality and a commitment to sustainability.

Speed Square 180 mm – precise marking in the brand look

Anyone who takes measurements on a daily basis needs absolute reliability – and that's exactly what the new carpenter's square made of dark blue aluminium alloy delivers. Its metric scale on both sides, continuous angle marking from 0° to 90° and integrated milling template, drilling jig and marking tool make it an indispensable aid. The wipeable note pad and compact measuring length of 180 mm ensure that ideas and measurements can be recorded right where they arise: in the middle of the work process.

Deep hole marker – write where others can't

The versatile deep hole marker is one of those little companions you'll never want to be without again. Thanks to its 2B graphite lead, it writes reliably on wood, metal, glass and many other surfaces. The marking depth of up to 45 mm opens up possibilities in places that remain inaccessible to normal pens. With an integrated sharpener in the push button and three replacement leads – in graphite, red and green – it is a tool that can be used intuitively and masters every situation.

3D printing filament in Festool colours – accessories for printing yourself

For those who want to make their Festool world even more individual, high-quality PETG filament is now available in the original Festool colours. With a standard diameter of 1.75 mm and a spool size that is compatible with common 3D printers, printing your own accessories has never been easier. The Festool 3D printing data is available online free of charge – ideal for producing your own organisation systems, holders or personalised tools and adapting your own setup perfectly to your working style.

Sporty sunglasses from UVEX – protection with style

When the sun comes out, they're a must-have: the new sporty UVEX sunglasses in Festool design are real eye-catchers – and offer powerful protection at the same time. With filter category 3 (light transmission 9–18 per cent) and 100 per cent UVA/UVB/UVC protection, they are ideal for long working days outdoors. Soft nose pads and soft temples provide a comfortable fit, while the dark blue-green look conveys the unmistakable Festool character. A high-quality glasses case ensures that they are always well protected.

Cap with 3D embroidery – clear attitude, high comfort

This cap is more than an accessory – it's a statement. The dark blue fabric is made from 20 per cent GRS-certified recycled cotton and 80 per cent BCI cotton. The high-quality 3D embroidery of the Festool logo gives it a strong identity, while the curved peak and adjustable metal fastener ensure a perfect fit for. Ideal for the construction site, workshop or leisure time – anywhere you want to show what you stand for.

Pocket umbrella from FARE® – compact, durable, visible

When the weather changes, this umbrella stays strong. The sustainable pocket umbrella from FARE® combines intuitive double automatic opening with the durable Windproof PLUS system for maximum flexibility, even in strong gusts. The recycled polyester pongee in green and dark blue and the reflective piping around the edge ensure visibility and safety – even in poor lighting conditions. The natural bamboo handle feels warm and comfortable in your hand, even on cold days.

Brand loyalty that works

Whether under bright sunshine, during unexpected rain showers or when working with precision in the workshop – the new fan shop items show how Festool consistently combines functionality and brand identity. The selection is clearly aimed at fans who are looking for reliable companions that also reflect their brand loyalty. Sustainable materials such as recycled textiles and bamboo also underline the commitment to responsible design.

The new fan shop products will be available from 7 April 2026. Further information is available at [festool.co.uk](https://www.festool.co.uk)

Function meets brand

– new accessories for the workshop, construction site and leisure time

Festool is expanding its fan shop in spring 2026 and launching products that combine function, brand passion and sustainable materials – ideal for precise work, creative extensions and comfortable travel.

Speed Square 180 mm – precise marking in the brand look

The robust carpenter's square made of dark blue aluminium alloy features a scale on both sides, continuous angle markings from 0° to 90° and integrated milling and drilling templates. The wipeable note pad makes it a quick and reliable companion on the construction site.

Deep hole marker – write where others can't

With a 2B graphite lead, 45 mm marking depth, integrated sharpener and three replacement leads, this pen reaches places where other tools fail – ideal for precise work in any trade.

3D printing filament – accessories for printing yourself

The high-quality PETG filament in Festool colours enables precisely fitting 3D-printed accessories for your own system. Standard dimensions and free printing data make it easy to get started.

UVEX sunglasses – protection with style

With 100 per cent UVA/UVB/UVC protection, filter category 3 and high wearing comfort, they are the new sporty companion for sunny days. The blue-green brand look makes them a real eye-catcher.

Cap with 3D embroidery – clear attitude, high comfort

Recycled and BCI-certified cotton, high-quality embroidery and a perfect fit combine sustainability and brand pride.

Pocket umbrella by FARE® – compact and durable

The sustainable umbrella with double automatic mechanism, Windproof PLUS system, reflective piping and bamboo handle provides reliable protection in all weather conditions.

Brand loyalty that works

All products demonstrate how consistently Festool combines function and identity – robust, well thought-out and practical.

Available from 7 April 2026. Further information is available at festool.co.uk

Function meets brand – new accessories for the workshop, construction site and leisure time

In spring 2026, Festool will expand its fan shop with practical, brand-typical accessories for precise work and everyday use.

First and foremost is the **Speed Square**, a dark blue aluminium alloy angle with continuous markings, a metric scale and a practical note-taking surface for precise construction site work. This is joined by the versatile **deep hole marker**, which confidently masters even hard-to-reach areas thanks to its 2B lead, 45 mm marking depth and integrated tip. For creative minds, Festool offers high-quality **3D printing filament** in brand colours – perfect for custom-fit accessories made of robust PETG. Outdoors, the new sporty **UVEX sunglasses**, equipped with 100 per cent UV protection and a striking blue-green design, are the perfect companion. Those who want to show off their style can opt for a modern **cap** made from recycled and BCI-certified cotton with a high-quality 3D logo. And when the weather changes, the durable **FARE® pocket umbrella** with double automatic, Windproof-PLUS and reflective piping provides reliable protection. The new fan shop items will be available from 7 April 2026. Further information is available at festool.co.uk
